At **MBSM Group**, we decided to fix that. We created **MBSM Glass Pro**, a sleek, “Glass-style” bridge between your articles and your downloads.

Make Your Tech Downloads Pop: Introducing MBSM Glass Pro

If you run a technical blog or a software hub on **Mbsm.tn**, you know that your download links are the most important part of your content. But let’s be honest: standard WordPress lists can look a bit... boring.

□ The “Glass” Experience

We wanted something that looks like the future. **MBSM Glass Pro** uses a modern **Glassmorphism** design. It creates a beautiful, semi-transparent, blurry grid that makes your ZIP files look like premium assets. It’s lightweight, it’s fast, and it works perfectly on everything from an iPhone to a 4K monitor.

□ Search with Intent (Keyword Filtering)

This is where the magic happens. You don’t have to show every single ZIP file on your site in one messy pile. Using our **Keyword Search Filter**, you can tell the plugin exactly what to look for.

- *Want to show only “Windows Tools”?* Set the keyword.
- *Need a gallery for “Android Firmwares”?* Just change the filter.
The plugin scans your articles, finds the files that match your keyword, and builds the gallery for you automatically.

□ Night Vision for the Late-Night Hustle

Most techies live in Dark Mode. We get it. That’s why our **v2.0.0 “Night Vision” update** is a game-changer. When you flip the switch to Night Mode:

- Titles turn into a **crisp, pure white** that’s easy to read.
- Dates and file info glow in an **Electric Cyan**, making them stand out against the dark glass background.
- No more eye strain—just a professional, high-contrast look that matches your favorite IDE.

□ How to Use It (The Magic Link)

We kept it incredibly simple. You don’t need to be a coder to use this. Once the plugin is active, just drop this shortcode into any page or post where you want your files to appear:
