Autoloa	ded options could affect performance
WordPr the opti	ded options are configuration settings for plugins and themes that are automatically loaded with every page load in ess. Having too many autoloaded options can slow down your site. Your site has 1055 autoloaded options (size: 982 KB) in ons table, which could cause your site to be slow. You can review the options being autoloaded in your database and any options that are no longer needed by your site.
